PROFESSIONAL SUMMARY

Senior Frontend / Full-Stack Engineer with 15 years of software development experience building and shipping customer-facing web products. Strong expertise in **React, TypeScript, JavaScript, Next.js, modern web development, and API-driven applications**, with experience owning complex features from requirements and UX implementation through backend integration, testing, deployment, and production support. Product-minded engineer with a strong focus on intuitive user experiences, maintainable code, performance, and close collaboration across product, design, and engineering.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI

Product Engineering: Customer-facing SaaS, authentication, onboarding workflows, subscriptions, payments, feature ownership, UX implementation

Backend & APIs: Node.js, Python, REST APIs, tRPC, service integrations, PostgreSQL, MySQL, MongoDB, Redis

Quality & Delivery: Unit/Integration Testing, TDD, Code Reviews, CI/CD, GitHub Actions, Docker, production troubleshooting

Cloud & Platforms: AWS, Vercel, S3, Lambda, SQS/EventBridge, observability and monitoring

PROFESSIONAL EXPERIENCE

Sayeeff Digital Agency UK | Senior Software Engineer Aug 2023–Present

- Built and shipped **customer-facing web and SaaS features** using React/Next.js, TypeScript, Node.js, and API-driven architectures.
- Owned features end-to-end, translating product requirements into responsive UI, backend integrations, data models, tests, and production releases.
- Implemented authentication, workflow, and account-facing experiences with attention to usability, reliability, performance, and clear failure states.
- Partnered with stakeholders on requirements and trade-offs, reviewed code, and improved maintainability through reusable components and engineering standards.

ScienceSoft | Senior Software Engineer May 2020–Jul 2023

- Developed high-quality **React and TypeScript** interfaces for customer-facing applications and integrated them with Node.js services and REST APIs.
- Delivered complex features across frontend and backend boundaries, including data-intensive screens, account workflows, and third-party integrations.
- Improved frontend and API performance through component optimization, caching, query improvements, and careful handling of asynchronous states.
- Contributed to code reviews, automated testing, CI/CD, debugging, and production support while collaborating with product and engineering teammates.

Digital Thing | Technical Lead Jul 2017–Apr 2020

- Led delivery of customer-facing web products from planning and technical design through implementation, testing, release, and iteration.
- Guided frontend architecture and reusable UI patterns while balancing product speed, UX quality, maintainability, and technical debt.
- Worked closely with product stakeholders and engineers to break down ambiguous requirements, evaluate trade-offs, and deliver incremental improvements.
- Mentored engineers through code reviews and technical feedback, strengthening testing discipline, code quality, and ownership across the team.

Thoughtworks | Full Stack Engineer Mar 2013–Jun 2017

- Built responsive customer-facing web applications using **JavaScript, modern frontend patterns, APIs, and relational databases** in Agile product teams.
- Implemented end-to-end features spanning UI, business logic, APIs, data persistence, testing, and deployment.
- Collaborated with product, design, QA, and engineering peers to refine user stories and deliver maintainable software through iterative releases.

IBM | Software Engineer Intern Jul 2011–Feb 2013

- Supported enterprise application development, UI and integration work, testing, debugging, and technical documentation while building foundational software engineering experience.

SELECTED PRODUCT EXPERIENCE

- Production AI marketing platform: built customer-facing workflows with **Next.js, Tailwind, tRPC, PostgreSQL, Stripe, authentication, and background processing**, with ownership spanning frontend experience, APIs, data, and production delivery.
- Built subscription/payment and account workflows using Stripe and API integrations, with focus on reliable customer journeys and clear application states.
- Experience building and reviewing reusable UI components and full-stack features where usability, performance, reliability, and measurable customer outcomes matter.

EDUCATION

Bachelor of Science in Computer Science — National University of Singapore, Aug 2007–May 2011
